

# Respireo SOFT Baby

supporting his first breath

**Developed in collaboration with pediatric pneumologists and intensivists, Respireo SOFT Baby is a mask dedicated to baby from 3 to 12 kgs (6 – 26 lbs).**

Respireo **SOFT**  
Baby

Babies faces differ greatly in their shapes from those of adults, in particular with a prominent forehead, no defined nose bridge and a growing & fragile bone structure. All the mask features are designed to address such specificities.

Entirely made of soft silicone, the cushion perfectly fits the facial characteristics of the patient and ensures minimal pressure points. With 5 fixation points, the headgear is specially designed to guarantee mask stability and perfect seal around the nose without over tightening.

The mask can be customised without forehead support to adapt to the most demanding faces.

# Respireo SOFT Baby Mask

## 5 points headgear

Large straps and the addition of a 5th fixation strap on the forehead ensures homogenous bearing points and stability whatever the pressures or baby's position.

## Silent and diffused vent system

## External port

To adapt to all kinds of non invasive treatments needs (signal measurement, oxygen supply etc.).

Also available in Non- Vented version.

## Soft and comfortable cushion

With a unique and thin lip to guarantee both air tightness and minimal pressure on the face.

## Rotary and flexible tubing at 360°

For a total sense of freedom.
